

*Professor Dov Aharonov was born in Haifa in 1938 and received his D.Sc from the Technion - ITT in 1967, under the guidance of Elisha Netanyahu. After his postdoctoral studies at the University of Maryland, he joined the Mathematics Department at the Technion. His main area of research is complex analysis at large, including geometric function theory, ordinary differential equations, quadrature domains, dynamical systems and circle packings. Prof. Aharonov has written three monographs and published over fifty research papers. Many of the Israeli mathematicians working in his fields of interest have been his students.*
